## **DETAILED ACTION**

### ***Election/Restrictions***

1. Claims 1 and 33 are directed to an allowable process. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 3-32, 34-48 and 50-52, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, the restriction requirement as set forth in the Office action mailed on 12/30/2004 is hereby withdrawn. In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claims including all the limitations of an allowable product claim or rejoined process claim are presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

### ***Allowable Subject Matter***

2. Claims 1-56 are allowed.

The following is the statement of reasons for the indication of allowable subject matter: The prior art disclosed by the applicant and cited by the Examiner fail to teach or suggest, alone or in combination, **all** the limitations of the independent claim(s) (claims 1 and 33), particularly an intermediary site/processor which receives information

indicating consent to establish a tunnel between two processors, where the two processors each send consent information to the intermediary site/processor. The prior art reference to Giniger discloses consent in the form of session keys, where the intermediary device, e.g., the management server, issues commands and security measures to two separate processors, e.g., edge devices, that want to communicate securely with each other (Column 14, lines 63+). However, the management server is the device that grants the consent, whereas the newly amended claims require the processors/edge devices to each grant consent information, and the consent information mediated by the intermediary/management device.
